

MEGA^{LITE}

outshine^{STRIP}
Q80

PRODUCT DESCRIPTION

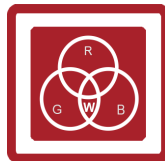

The Outshine Strip Q80 is the new sleek modern exterior and interior strip liner light source. Its compact low profile size makes it ideal as a running strip in low ceiling applications or as a foot uplight to reduce shadowing from above in dance or runway applications. Making it ideal for wall washing or key lighting. The Ip65 rating allows fixture to be permanently mounted outside or used inside as a silent fan-less unit. The simple to use touch sensitive display makes programming and addressing the unit easier. Its flicker free performance and low profile appearance make it a great installation unit for most production needs.
